Dear Srdjan Vlajkovic

R713 - APPROVAL NOTICE

Cisplatin ototoxicity: adenosine-based therapeutic opportunities

Your application to use animals in research was considered on 27/02/2009 and the committee is pleased to advise that this application has now been approved. Ethics approval was given for a period of 3 years.

Approval date 07/04/2009
Expiry date 07/04/2012

Condition of Approval

All deaths which occur prior to the planned end of experiment must be notified to the AEC so that a post mortem may be performed if required by the Animal Welfare Officer. This includes all animals that are found dead or moribund, or killed due to abnormalities which make them not fit for purpose.

New model. The AEC are interested in monitoring some of the manipulations in this protocol. Please inform the AEC when you have a work schedule finalised.

Please note the requirement regarding reporting of animal use brought about by the Animal Welfare Act 1999.

As Responsible Investigator it is your statutory responsibility to provide usage statistics to the AEC for incorporation into the University consolidated return to MAF. This is required on an annual basis. On completion of the project please submit an end of approval report along with final animal use figures for the whole project.

Forms for Animal Ethics Committee use can be found at:
<http://www.health.auckland.ac.nz/research/forms/ethics/animal>

Regards,

Jeanette Anderson

Secretary
Animal Ethics Committee
