

Declaration of use of animal in research

Manuscript number: 37509

Title of manuscript: Genetic defects in ciliary genes in autosomal dominant polycystic kidney disease.

Research study: Mutational analysis of genes affecting the structure and function of the primary cilium and their role in autosomal dominant polycystic kidney disease.

Supportive foundation: Supported by the Slovak Research and Development Agency under Contract No. APVV-14-0234.

Declaration:

In our study, no animal models, cultures or animal cell lines were used that would require approval by the Animal Ethic Committee.
