COMMENTS TO AUTHORS

This is a good study that have explore the diagnostic accuracy of in-vivo lesion characterization in colonic IBD, and have compared various methods. It demonstrated that Real-time CLE is a highly accurate technology for differentiating neoplastic from non-neoplastic lesions in patients with colonic IBD. This meta-analysis was complied with the PRISMA 2009 Checklist strictly, and this is a very good written manuscript. We recommend the publication of this paper.
