Dear Sir or Madam:

We greatly appreciate the favorable review of our Field of Vision submission to the World Journal of Cardiology. In reviewing the report, it appears that the classification was very good with priority publishing. The comments to the authors were favorable and there did not appear to be any obvious revisions necessary, other than some minor changes to the text. We reviewed the comments that were provided by the Reviewer and the questions on the Downloaded version and have made the appropriate changes. In addition, several references were added that had been mentioned in the text.

Hopefully, are manuscript is now suitable for publication. Please let me know if you have any additional questions or concerns by contacting me at any time.

Thank you,

A handwritten signature in black ink, appearing to read 'MSF', written in a cursive style.
