Proposed approach to the challenging management of progressive GERD

Joachim Labenz, Parakrama T Chandrasoma, Laura J Knapp, Tom R DeMeester

Abstract

The progression of gastroesophageal reflux disease (GERD) in patients who are taking proton pump inhibitors (PPIs) has been reported by several investigators, leading to concerns that PPI therapy does not address all aspects of the disease. Patients who are at risk of progression need to be identified early in the course of their disease in order to receive preventive treatment. A review of the literature on GERD progression to Barrett's esophagus and the associated physiological and
