Irritable bowel syndrome in children: Current knowledge, challenges and opportunities

Devanarayana NM *et al.* IBS in children

Niranga Manjuri Devanarayana, Shaman Rajindrajith

Abstract

Irritable bowel syndrome (IBS) is a common and troublesome disorder in children with an increasing prevalence noted during the past two decades. It has a significant effect on the lives of affected children and their families and poses a significant burden on healthcare systems. Standard symptom-based criteria for diagnosis of pediatric IBS have changed several times during the past two decades and there are some differences

Irritable bowel syndrome (IBS) was first mentioned as a concept in the Rocky Mountain Medical Journal in 1950 and so is a modern day epidemic. Recurrent abdominal pain (RAP), an important feature of IBS, was first described by Apley and Naish in 1958. Their criteria were 3 episodes of abdominal pain over 3 months ...
