Dear editor

Our medical publishing group has been a national leader over the last 20 years in providing language services to the publishers and authors alike.

Herein, we are pleased to confirm that the article 39001 "Fiber-enriched diet helps to control symptoms and improves esophageal motility in patients with non-erosive gastroesophageal reflux disease" by S. Morozov, V. Isakov, M. Konovalova has been edited by our company and its language quality is now considered to have reached Grade A.

Yours sincerely,

Alexander Mzhelsky
