Mediterranean diet and nonalcoholic fatty liver disease

Anania C *et al.* Mediterranean diet and NAFLD

Caterina Anania, Francesco Massimo Perla, Francesca Olivero, Lucia Pacifico, Claudio Chiesa

Abstract

Nonalcoholic fatty liver disease (NAFLD) is emerging as the most common chronic liver disease, and is characterized by a wide spectrum of fat-liver disorders that can result in severe liver disease and cirrhosis. Inflammation and oxidative stress are the major risk factors involved in the pathogenesis of NAFLD. Currently, there is no consensus concerning the pharmacological treatment of NAFLD. However, lifestyle interventions
