To Whom It May Concern:

This is to confirm that Dr. Ishikawa's manuscript entitled, "Strategy for improving survival and reducing recurrence of HCV-related hepatocellular carcinoma" has been edited by a native English speaker at Forte, Inc. Forte is a Japan-based company that employs editors and rewriters with a science background. We have been helping the Japanese scientific community to publish in international journals since 1987.

Assuming that the author has input all changes correctly and has made no additional changes prior to submission, this paper should now meet the grammatical standards necessary for submission to an English language journal.

Should you require any additional information about our services, please do not hesitate to contact our office.

Sincerely,

Chandler Gibbons  
Chandler Gibbons
