

## CONSENT FORM FOR CASE REPORTS

**Case Report Title:** Irreducible Anterior Trans-Olecranon Fracture Dislocation of the Elbow in children: a case report.

**Principal Investigator:**

**Signature:**

You are being asked to consider allowing [REDACTED] to use information about your child's health, performed investigations and management to write what is called a case report.

Case reports are typically used to share new unique information experienced by one patient during his/her clinical care that may be useful for other physicians and members of a health care team.

A case report may be published for others to read, and/or presented at a conference. This form explains the purpose of this case report. Please read this form carefully and take your time to make your decision and ask any questions that you may have. The purpose of this case report is to inform other physicians that the management of your child's uncommon injury may be sometimes difficult needing surgery, describing our approach and its functional result.

The information being used for this case report includes the details of your child's clinical condition, perioperative care and postoperative recovery.

[REDACTED] is obligated to protect your child's privacy and not disclose your child's personal information (information about your child and his health that identifies him as an individual e.g name, date of birth, medical record number).

When the case report is published or presented, your child's identity will not be disclosed. Although his personal information collected or obtained will be kept confidential and protected to the fullest extent of the law, there is a limited risk associated with this case report that could result in a loss of confidentiality by virtue of his unique experience. You and your child will not directly benefit from participating in this case report. The information that can be shared with other health care professionals, however, may improve the care that is received by others in the future. Allowing your child's information to be used in this case report will not involve any additional costs to you. You will not receive any compensation. Taking part in this case report is your choice (voluntary). You may choose not to take part or you may change your mind at any time.

However, once the case report is written and published, it will not be possible for you to withdraw it. Your decision will not result in any penalty or loss of benefits to which you are entitled including the quality of care given to your child. You will be told about any new information relating to this case report that may affect you. Your signature below means that you have read the above information about this case report and have had a chance to ask questions to help you understand how the information will be used and that you give permission to allow it to be used in this case report.

## SUBJECT CONSENT TO PARTICIPATE

**Case Report Title:** Irreducible Anterior Trans-Olecranon Fracture Dislocation of the Elbow in children: a case report.

**Name of Participant:** 

**Participant/Substitute decision-maker:**

By signing this form, I confirm that:

- The case report has been fully explained to me and all of my questions have been answered to my satisfaction.
- I have been informed of the risks and benefits, if any, of allowing my child's information to be used in this case report.
- I have been informed that my child does not have to participate in this case report.
- I have read each page of this form.
- I authorize access to my child's personal health information (medical record) as explained in this form.
- I have agreed that my child participate in this case report.
