Gastric adenocarcinoma of fundic gland type with signet-ring cell carcinoma component: A case report and review of the literature

Keita Kai, Masaaki Satake, Osamu Tokunaga

### Abstract

A depressed lesion was found at a gastric angle of 76-year-old Japanese woman by esophagogastroduodenoscopy. Four years prior, she was diagnosed with a *Helicobacter pylori* infection but no eradication was performed. The pathological diagnosis of biopsy specimens was signet-ring cell carcinoma. Endoscopic
