SPECIFIC COMMENTS TO AUTHORS

The authors timely reviewed the efficacy, safety, and tolerability of vedolizumab reported in both randomized, controlled, clinical trials and from real-world experience in patients with UC and CD in order to identify its place in treatment algorithms for IBD.

SPECIFIC COMMENTS TO AUTHORS

This is an interesting review. Few suggestions to the authors, they can include a diagram to explain the action of the drug. Secondly they should discuss data on combination of vedolizumab with anti TNF. Finally if available data on Asian patients can be included as

well as Asian IBD is different both genetically and phenotypically. Minor corrections.
page 4 generalisation is spelt wrong.
