

July 7, 2018

Dear Editor

We deeply appreciate your helpful and careful revisions to our manuscript entitled "Unicentric Castleman disease presenting as a retroperitoneal peripancreatic mass: Report of two cases", which have helped us to improve the manuscript.

Please find enclosed our revised manuscript (file name: 39373-Revised-Manuscript-revision.docx). Running title, all authors' ORCID numbers, CARE Checklist (2013) statement, Open-Access and Copyright were added to the manuscript following your reminders and the guidelines and requirements for manuscript revision. A copy of the full approved grant application form(s), consisting of the information section and body section was provided to the BPG in PDF format. Likewise, an audio file describing the core tip was provided. Further, we added yellow arrows to point the lesion in MR imaging (Figure 1 and Figure 4) according to the comments of reviewers. In the revised manuscript, all of the revisions were highlighted with yellow.

All authors approved the revised version of the manuscript. Thank you again for considering the possible publication of our manuscript in *World Journal of Gastroenterology*.

Sincerely yours,

On behalf of all authors,

Dr. Hu Tian (ID:03214632)
