Diets, functional foods, and nutraceuticals as alternative therapies for inflammatory bowel disease: present status and future trends

Running title: Diets, functional foods and IBD

Mohammad Al Mijan, Beong Ou Lim

Abstract

Inflammatory bowel disease (IBD) is a serious health concern among western societies. The disease is also on the rise in some East Asian countries and in Australia. Health professionals and dietitians around the world are facing an unprecedented challenge to prevent and control the increasing prevalence of IBD. The current therapeutic strategy that includes drugs and biological treatments is inefficient and
