Endoscopic therapy for Barrett's esophagus and early esophageal adenocarcinoma

[HTML] nih.gov

[CL Leggett](#), [EC Gorospe](#), [KK Wang](#) - Gastroenterology Clinics, 2013 - [gastro.theclinics.com](#)

Background Endoscopic ablation therapy has evolved from being a possibility in patients who could not undergo esophagectomy to a standard of care for the treatment of early esophageal neoplasia (EAC). Its increasing efficacy and decreasing morbidity through the years have made this approach the preferred treatment for Barrett's esophagus (BE) with high-grade dysplasia (HGD) and early EAC. 1 x 1 Prasad, GA, Wang, KK, Buttar, NS et al. Long-term survival following endoscopic and surgical treatment of high-grade dysplasia in ...
