Update on global epidemiology of viral hepatitis and preventive strategies

Meryem Jefferies, Bisma Rauff, Harunor Rashid, Thao Lam, Shafquat Rafiq

Abstract

Viral hepatitis is one of the major public health concerns around the world but until recently it has drawn little attention or funding from global health policy makers. Every year 1.4 million people die from viral hepatitis related cirrhosis and liver cancer. However, the majority of the infected population are unaware of their condition. This population have significant obstacles to overcome such as lack of
