SPECIFIC COMMENTS TO AUTHORS

The editorial is a quick set-up of the use of EGDS before and after Sleeve gastrectomy. The bibliography should be reviewed because, for what concerns the post-operative surveillance endoscopy, it is not put in order of citation. Article 18 is reported but the list of publications presents 16 works.

SPECIFIC COMMENTS TO AUTHORS

The editorial by Kassir et al., No.40156, provides an overwhelming evidence supporting the need for routine surveillance endoscopy before and after sleeve gastrectomy. Based on the cited literature data, the authors recommend the use of systematic OGDF in the pre-operative phase. Moreover, they also suggest the value of stomach cartography, and

advocate that patient with GERD should undergo a pre-sleeve pH and manometry test. The paper is well written, with clear objectives and summary, and amply supported by the literature references.

SPECIFIC COMMENTS TO AUTHORS

Great to publish this so more people know. This is not a general consensus, though and this should be stated.
