Hepatitis C resistance to NS5A inhibitors: Is it going to be a problem?

Sharafi H *et al.* Hepatitis C resistance to NS5A inhibitors

Heidar Sharafi, Seyed Moayed Alavian

**Abstract**

Treatment of hepatitis C virus (HCV) infection has evolved greatly through the recent decade. The availability of direct-acting antiviral agents (DAAs) targeting the functional proteins of HCV has resulted in the introduction of DAA-based combination therapies, providing an optimal rate of treatment success. Among the DAAs, NS5A inhibitors are used in most of the introduced and approved HCV antiviral regimens.
