

Dear Editor,

My original research article entitled "Low Dose Spectral Insufflation CT Protocol Preoperatively Optimized for T Stage Esophageal Cancer: Preliminary Research Experience" for consideration for publication in "World Journal of Gastroenterology".

This is a perspective study, but is not a clinical trial. So we have no Biostatistics Review Certificate submit at this time.

Thank you for your consideration!

Sincerely,

Jianbo Gao, MD, PhD
Department of Radiology
The First Affiliated Hospital of Zhengzhou University
