Sharma G *et al.* Angiomyolipoma masquerading as liposarcoma

Gopal Sharma, Ayush Jain, Prerit Sharma, Sonal Sharma, Vinita Rathi, Pankaj Kumar Garg

Abstract

A 42-years-old lady, presented with a large retroperitoneal mass which was preoperatively diagnosed as a retroperitoneal liposarcoma following an image guided core biopsy. She underwent a margin-negative resection of the retroperitoneal mass (multi visceral resection - enbloc excision of the retroperitoneal mass with a left
