Coexistence of duodenum derived aggressive fibromatosis and paraduodenal hydatid cyst

Akbulut S *et al.* Approach to desmoid type fibromatosis

Sami Akbulut, Mehmet Yilmaz, Saadet Alan, Mehmet Kolu, Nese Karadag

Abstract

Intraabdominal aggressive fibromatosis is a locally aggressive tumor mostly originating from the mesentery or retroperitoneal space, infiltrating adjacent tissues, and very rarely metastasizing to distant organs. There are only two case reports in the English language literature where intraabdominal aggressive fibromatosis originated from the intestinal wall. In this study we aimed to report a case of
