Dr. Fang-Fang Ji  
Science Editor, Editorial Office  
World Journal of Clinical Cases

Dear Dr. Fang-Fang Ji,

Enclosed find the edited manuscript "Full-term pregnancy in breast cancer survivor patient with fertility preservation" by Garrido-Marín et al. reviewed for consideration for publication in World Journal of Clinical Cases.

We have done everything you and the reviewer asked us to do, thus improving the quality of the manuscript. A language professional editor has also edited the English of the manuscript.

Here is the point-to-point answer to you and the reviewer comments:

Your comments:

- We have added the phrase "literature review" to the title, adding new references into the reference section accompanying textual content in the text. The new references are 3, 9, 23, 24 and 25.
- We have added the postal code where needed.
- We have included the Article Highlights.
- We have provided the decomposable Figure 1 in word format.
- We have included the meaning of the asterisks of Figures 2, 3 and 5.
- We have marked the location of Figure 6 in the text.

The reviewer's comments:

- We have changed all the grammar changes the reviewer has suggested.
- We have added the reference to the sentence "The most serious complication after ovarian stimulation is ovarian hyper-stimulation syndrome (characterized by ovarian enlargement due to multiple ovarian cysts and an acute fluid shift into the extravascular space)", reference number 11.
- We have replaced HER2+ by HER2.
- We have added the generic name Letrozole and put the brand name (Femara®) in brackets. In addition, we have added details of the dose, route and frequency of usage.
- We have added details of the dose, route and frequency of usage of Tamoxifen and Trastuzumab.
- We have added the dose and the frequency of the medication Suavuret®.

- We have explained what a “type A embryo transfer” is.
- We have replaced “implantation” by “transfer”.
- We have written the numbers of the pregnancy weeks as the reviewer suggests.
- We have added information about breastfeeding.
- We have revised the past tense of the entire document.

All these changes are included in the resubmitted edited manuscript no 40840. If you activate the tracking changes tool of Microsoft office, you will find all changes done throughout the manuscript. Some of the main changes are highlighted in the text.

In addition, we have submitted the following documents:

- The approved grant application form.
- The updated (after the editing) CARE Checklist (2016).
- The language certificate by professional English language editing company.
- The Audio Core Tip.

I want to thank you in advance for the extra time you have given us to be able to review the manuscript as well as to obtain all the documents needed for the re-submission of the manuscript.

I certify that the final version of the manuscript has been seen and approved by all authors, who have taken due care to ensure the integrity of the work. I also declare that the authors do not have any conflicts of interest in connection with the paper.

Finally, I verify that neither the submitted paper nor any similar paper has been or will be submitted to or published in any other printed or digital publication.

Yours sincerely,

Pepita Giménez-Bonafé, Ph.D, Ms.C
