successful to full term with only one cryopreserved embryo. The report described the procedures in detail about the process of the disease, the oocyte preservation, chemotherapy, the treatment of the gynecological disease, IVF and pregnancy. The author discussed about the factors which could influence the successful of pregnancy. It provides the clinicians some thoughtful idea of multidisciplinary cooperation in the management. Such as surgery, chemotherapy, gynecology, and reproduction. It may play a role in guide clinicians in similar patient's management. In general, this case report is written very carefully and discussed in detail about the complex of poor condition to conceive. The successful experience will help clinicians in similar cases. The discussion is complete in detail covering the related factors affecting conceding. Very written case report.
