SPECIFIC COMMENTS TO AUTHORS

General comments: This is an interesting case report; however, I wish to comment as follows; Title: Adequate. However, IgA should be written in full. Abstract: Page 2, line 7; Laboratory data showed edema?. I think edema can only be seen clinically but

not through laboratory test. Also, indicate the part of the body that was edematous. Is it pedal or facial edema? Keywords: IgA should be written in full Introduction: Adequate. Page 2, line 10; CsA was defined in page 2 line 10, therefore in page 2, line 26, no need to define again. Abbreviation CsA should be used. Page 3, line 10; write RBCs in full. Page 3, line 19; C3 should be written in full. Page 3; line 23; 2-mo treatment should be written properly. Figures: Figures are not well labeled. Arrows or letters should be used to indicate where the lesions are found in the figures. Page 4; Suin (2004), is not referenced properly intext, and is not found in reference section.

SPECIFIC COMMENTS TO AUTHORS

The case report is well presented and is of interest for the specialty. I have few comments for the authors: 1) Abstract section: Laboratory data showed edema. Edema is a clinical sign. Please, correct. 2) Figure 4. To which antigen belongs the immunostaining? (IgA or
