## Unresolved issues in the prophylaxis of bacterial infections in patients with cirrhosis

Dirchwolf M *et al.* Antibiotic prophylaxis in cirrhosis

Melisa Dirchwolf, Sebastián Marciano, José Martínez, Andrés Eduardo Ruf

### Abstract

Bacterial infections are highly prevalent and a frequent cause of hospitalization and short-term mortality in patients with cirrhosis. Due to their negative impact on survival, antibiotic prophylaxis for bacterial infections in high-risk subgroups of patients with cirrhosis has been the standard of care for decades. Patients with prophylaxis indications include those at risk for a first episode of spontaneous bacterial peritonitis (SBP) due to a low ascitic fluid protein count and impaired liver
