SPECIFIC COMMENTS TO AUTHORS

This is a well written paper on ERCP complications in patients with ESRD. 1. Patients with ESRD often have comorbidities such as cardiovascular diseases and are on antithrombotic agents. It would be great if data on antithrombotic agents can be

extracted from the database. If data are not available, please add data on some diseases which are likely to need antithrombotic agents but included in Charlson comorbidity index such as MI, CVI or TIA. 2. It is well known that patients with ESRD are at high risk for bleeding. EPBD can be an option in this setting according to your results. Please cite a paper by Takahara et al. (J Gastroenterol. 2012 ;47:918-23) and discuss. 3. Please explore the effects of hospital volume on the results in this population. Is it possible whether ERCP is safer in a high volume center?

SPECIFIC COMMENTS TO AUTHORS

Very important topic regarding ERCP adverse events in end stage renal disease. The background adequately describes the idea. The results are clear and the discussion is appropriate. The results should be validated by larger studies which is mentioned in the

SPECIFIC COMMENTS TO AUTHORS

This is a well-written, retrospective study evaluating the association between ESRD and development of ERCP complications. Although the study has some limitations due to its retrospective design and origin of data, the manuscript is scientific and gives
