**SPECIFIC COMMENTS TO AUTHORS**

Interesting review of this rare pathology, congratulations. I would like to make some small considerations. Page 7. Clinical presentation: "The usual presentations include GI bleeding (hematemesis, melena, and hematochezia) (68%), diarrhea (52%), abdominal pain (40%), abdominal distension (12%), dysphagia (8%) and vomiting". It is described

**SPECIFIC COMMENTS TO AUTHORS**

The authors are to be commended for having many cases of SJS with gastrointestinal involvement. As pointed out in the discussion, the current literature is limited. So this study would contribute to this field. Manuscript is well written and clear in their aims and findings. I am not sure what that means: Page 11: Conclusion: The following
