Mannheim, 23<sup>rd</sup> of August 2018

Dear Dr. Ya-Juan Ma,

the previous attempt to submit our review entitled **“Instantaneous wave-free ratio (iFR<sup>®</sup>) to determine hemodynamically significant coronary stenosis - a comprehensive review“** with the expired manuscript ID (41318) has been rejected because of i.a. the missing non-native speakers of english editing certificate. Thank you very much for enabling our group to start a new Submission for your journal.

The Baishideng Publishing Group (BPG) guidelines for the submission of a manuscript require an english editing certificate only for non-native speakers. We kindly ensure you that Ms. Elizaveta Skarga, the 3<sup>rd</sup> coauthor, is a native speaker. She carefully revised the language of our manuscript and is therefore able to provide the adequate quality of english language to meet the requirements for academic publishing.

Current manuscript ID: 41709

Invited manuscript ID: 03765286

Please find enclosed our review entitled **“Instantaneous wave-free ratio (iFR<sup>®</sup>) to determine hemodynamically significant coronary stenosis - a comprehensive review“** for your kind consideration for publication in the *World Journal of Cardiology*.

Sincerely yours,

Stefan Baumann, MD

Dirk Lossnitzer, MD
