Potassium-competitive acid blockers - are they the next generation of proton pump inhibitors?

Rawla P *et al.* Potassium-competitive acid blockers

Prashanth Rawla, Tagore Sunkara, Andrew Ofosu, Vinaya Gaduputi

Abstract

The modern lifestyle caters to an increase in the incidence of peptic ulcer disease, gastroesophageal reflux disease and several other acid-related conditions of the gut. The drugs to prevent these conditions work either through H2 receptor blockade or inhibition of the H⁺, K⁺ ATPase enzyme. Although proton pump inhibitors have been proven to be efficacious, they have a slow onset of action with limited resolution of
