Manuscript NO: 42182

Title: A didactic surgical experience of thyroid metastasis from renal cell carcinoma which caused massive intraoperative bleeding: A case report

Dear Editor,

We are grateful to the Journal for pointing out areas where the report of our study can be improved. We hope that the following explanatory notes and adjustments to the manuscript will serve to bring the paper up to the standard required for publication in the Journal.

**Point-by-point responses:**

- Reviewer's code: 03521962

**Core tip: In one sentence, add the possible contradiction(s) for this procedure in the core tip.**

We added a sentence that "unless the patient has appropriate reasons to avoid surgery" in the end of the Core tip.

**Introduction: 1. Intext referencing pattern is not in line with journal format.**

We revised the intext referencing patterns.

**Introduction: 2. Adequate word spacing throughout the manuscripts is recommended.**

We think the word spacing is appropriate throughout the manuscript.

**Case report: "CT" should be written as CT scan "MRI" should be defined on first use before abbreviation is used subsequently.**

We revised these terms in the manuscripts.

**References: Please rearrange the authors' name in reference 12 to appear as in the original manuscript.**

We confirmed that the authors' name in reference 12 to be correct as in the original article.

Thank you.  
Kind regards,
