

Signed Informed Consent Form

The PGSAS study was a nationwide, large-scale, retrospective observational study. The Signed Informed Consent Form of this study is collected in each facility in Japan and is stored in each facility. Therefore, it is difficult to collect all 2368 Signed Informed Consent Forms, so please understand that it is difficult to submit.

The dataset of this study is the same as the following paper, and the Signed Informed Consent Forms are also the same as the following paper.

Nakada K, Takahashi M, Ikeda M, Kinami S, Yoshida M, Uenosono Y, Kawashima Y, Nakao S, Oshio A, Suzukamo Y, Terashima M, Kodera Y. Factors affecting the quality of life of patients after gastrectomy as assessed using the newly developed PGSAS-45 scale: A nationwide multi-institutional study. *World J Gastroenterol* 2016; 22: 8978-8990 [PMID: 27833389 DOI:10.3748/wjg.v22.i40.8978]

Takahashi M, Terashima M, Kawahira H, Nagai E, Uenosono Y, Kinami S, Nagata Y, Yoshida M, Aoyagi K, Kodera Y, Nakada K. Quality of life after total vs distal gastrectomy with Roux-en-Y reconstruction: Use of the Postgastrectomy Syndrome Assessment Scale-45. *World J Gastroenterol* 2017; 23: 2068–2076 [PMID: 28373774 DOI: 10.3748/wjg.v23.i11.2068]
