Abstract

BACKGROUND

Collision carcinoma is rare in clinical practice, especially in the head and neck region. In this paper, we report a case of squamous cell carcinoma (SCC) and neuroendocrine carcinoma (NEC) colliding in the larynx and review 12 cases of collision carcinoma in the head and neck to further understand collision carcinoma, including its definition, diagnosis, and treatment.

CASE SUMMARY

A 61-year-old man presented with a 1-year history of hoarseness. Contrast-enhanced magnetic resonance imaging (MRI) of the larynx revealed
