SPECIFIC COMMENTS TO AUTHORS

The manuscript by Badahdah AM et al describes the results of a survey among health care workers at Hajj, regarding vaccination with a mandatory meningococcal, a highly recommended influenza, and an optional pneumococcal vaccine. The study is well

organized and presented clearly. The conclusions provide novel information about the reasons for getting or not getting vaccinated. These results are important and should be published in order create better awareness of vaccination programs and to help implement policies to increase the vaccination success.
