Vitamin d therapy in children with inflammatory bowel disease: A systematic review

Tarah Rigterink, Laura Appleton, Andrew S Day

Abstract

BACKGROUND

Vitamin D deficiency is highly prevalent in children with Inflammatory Bowel Disease. This may contribute to an increased risk of poor bone health and may also influence the course of disease. An optimal treatment strategy of vitamin D therapy in children with Inflammatory Bowel Disease has not yet been established.

AIM

To analyse the published intervention studies of vitamin D therapy in children with
