

Dear Editor,

Please find enclosed the edited manuscript in Word format (file-name: Sugita WJH review.doc)

**Title:** MR evaluation of biliary malignancy and condition at high-risk for biliary malignancy: current status

**Author:** Reiji Sugita

**Name of Journal:** World Journal of Hepatology

**ESPS Manuscript NO:** 4287-edited

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated
2. Revision has been made according to the suggestions of the reviewer

Reviewer 1 (68209)

1. Differential diagnosis should be discussed in each disease---According to your suggestion, I added differential diagnosis in Table.
2. Key findings of MRI in each disease should be summarized in table---According to your suggestion, I described key findings of MRI in each disease in Table.
3. Comparison with other imaging modalities should be described----According to your suggestion, I added comparison with other imaging modalities in Table.
4. MR imaging and MRI should be integrated----According your suggestion, I corrected.
5. There are several misspellings and grammar error----According to your suggestion, I corrected.

Reviewer 2 (68510)

It is better if the author can have a table-----According to your suggestion, I made a table.

Reviewer 3 (160065)

1. The author should give more information about (1) the successful or unsuccessful of MRI in diagnosis of malignancy VS benign, (2) sensitivity and specificity (3) pitfall of MRI.----According to your suggestion, I added (1)-(3) in main body and/or table.
2. There are some typing errors----According to your suggestion, I corrected.
3. References and typesetting were corrected.

Thank you again for publishing our manuscript in the World Journal of Hepatology.

Sincerely yours,

Reiji Sugita, MD
