World Journal of Gastroenterology

23rd October 2012

Dear Sir/Madam

Re: Brief Article: Short term outcomes of laparoscopic total mesorectal excision compared to open surgery. Gong J et al. a prospective study

Certificate of English language accuracy

This letter certifies that the English language used in the above article reflects accurately the meaning and intent of the authors. The terminology and descriptive text is clear, grammatically accurate and interprets correctly the objectives, outcomes and discussions necessary to communicate the findings of their study to an English speaking reader familiar with the field of the study.

Yours faithfully

Lee David Edwards F.R.S.A.
