### SPECIFIC COMMENTS TO AUTHORS

General comments: This manuscript is well written and is of clinical significance.

However, I have the following comments. Title: HCL should be written in full.

Abstract: • Authors should ensure that all abbreviations used in this manuscript are

written in full and abbreviation in parenthesis, thereafter abbreviation can be used, e.g.,  
HCl, TACE, CT/MRI, PET/CT, PECIST. • Proper words spacing Discussion: (i)  
Peng ZW et al should be written as Peng et al (ii) "... to achieved" should be corrected.  
References: Adequate

### SPECIFIC COMMENTS TO AUTHORS

This is a case report of 3 cases of HCC occurring in the caudate lobe of the liver that were treated with initially TACE but when the disease recurred/progressed during follow up the tumours were treated with RFA enhanced with HCL. The position of these tumours

was technically challenging but they were treated safely and with what appears to be good effect. This is an important paper because it demonstrates safety & tolerability of treated tumours in this position with RFA. I think that the only issue is that the manuscript is too long for a 3 case report paper. If it could be considerably condensed then it would be worthy of publication.
