SPECIFIC COMMENTS TO AUTHORS

I read with interest the article entitled "Hepatitis C: from inflammatory pathogenesis to anti-inflammatory/hepatoprotective therapy" by Hu Li et al. The Review was aimed at reporting the pathogenesis of inflammation related to HCV and the potential role of new anti-inflammatory drugs in reducing this inflammation, improving the natural history of HCV.-hepatitis. The Review is well-written and it gives a good overview of the pathogenetic mechanisms involved in inflammation and the role of these drugs. The literature was reviewed extensively and appropriately.

Response: Thank you very much for your positive comments.
