SPECIFIC COMMENTS TO AUTHORS

The article presents an interesting topic. However, the word 'Case series' might be more appealing for this case report title.

SPECIFIC COMMENTS TO AUTHORS

The manuscript is a case study not a research work. Better it should be published as technical report in their University.

SPECIFIC COMMENTS TO AUTHORS

This article describes about case reports of Gaucher disease (GD) in Montenegro. Clinical phenotypes of GD have been revealed to correlate with glucocerebrosidase (GBA) gene mutations. N370S was the most common mutation in all five patients examined. A table

manuscripts submitted to our journal. Therefore, we are returning the manuscripts that are inappropriate as quickly as possible without a time consuming and formal review. In making this decision we do not intend to criticize your work. We are sure that others in this specialized field will find it interesting, but our decision is solely based on the paper's inappropriateness. Please do not be discouraged and rest assured that we will welcome other manuscripts from you to be considered for publication in our journal.

SPECIFIC COMMENTS TO AUTHORS

The Authors described 5 cases of Gaucher disease, all studied at genetic level. The main point of interest relies on the lack of previous description of cases from Montenegro. I have a few specific comments: 1) When genotype-phenotype correlations are claimed,

https://www.wjgnet.com

they should be evident and statistically proved. I do not feel that in this cases any significant correlation could be demonstrated. The title should be then changed to "genotypic and clinical (or phenotypical) characterization" 2) Table 1: heading lanes should be limited to one, putting the case number in an additional column at the beginning. This would make the table more clear
