## PEER-REVIEW REPORT

**Name of journal:** World Journal of Gastrointestinal Surgery

**Manuscript NO:** 43493

**Title:** Safe laparoscopic cholecystectomy: Adoption of universal culture of safety in cholecystectomy

**Reviewer's code:** 03035949

**Reviewer's country:** France

**Science editor:** Fang-Fang Ji

**Date sent for review:** 2018-11-14

**Date reviewed:** 2018-11-15

**Review time:** 8 Hours, 1 Day

**SPECIFIC COMMENTS TO AUTHORS**

This is an interesting review aiming to assess risk factors for major complications in laparoscopic cholecystectomy. There has been a great deal of interest on this topic and much effort has been devoted to avoiding the devastating complications, such as bile

duct injury. This review article seems informative and educational. Nonetheless, I would prefer to be informed about potentially important issues in brief comments, as follows. #1 How do the authors think about the clinical relevance of preoperative imaging, such as MRCP or CT, to evaluate anatomical variances or severity of inflammation? #2 How should the cases of suspected or incidental gallbladder malignancy treated? The intraoperative spillage of the gallbladder contents into the abdominal cavity could lead to the dissemination of tumor cells if a malignant lesion were present.
