Current and future pharmacological therapies for managing cirrhosis and its complications

Kockerling D *et al.* Pharmacological management of cirrhosis

David Kockerling, Rooshi Nathwani, Roberta Forlano, Pinelopi Manousou, Benjamin H Mullish, Ameet Dhar

Abstract

Due to the restrictions of liver transplantation, complication-guided pharmacological therapy has become the mainstay of long-term management of cirrhosis. This article aims to provide a complete overview of pharmacotherapy options that may be commenced in the outpatient setting which are available for managing cirrhosis and
