

## Format for ANSWERING REVIEWERS

September 28, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 4540-review.doc).

Title: Gastric nNOS reduction accompanied by NPs signaling pathway up-regulation in diabetic mice

**Author:** Hong-Li Lu, Xu Huang, Yi-Song Wu, Chun-Mei Zhang, Xiang-Min Meng, Dong-Hai Liu, Young-chul Kim, Wen-Xie Xu

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 4540

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) a scheme showing the signaling pathways and the new findings/relationships between nNOS and NPs should be included. *It is very important comment. In the revised manuscript we give prominence to the new findings in abstract, discussion.*

(2) siRNA or antagonists could be used to retard specific pathway to further support the role of newly identified pathway in gastric fundus. *It is a constructive suggestion. Because there no commercial blocker of NPRs so we will further investigate the relationship between NPs signal pathway and damage of NOS neuron using siRNA method in diabetic mouse model.*

(3) The grammar and spelling should be carefully polished.

*According to the comment we have invited two foreign colleague and corrected our manuscript as well as we have trusted English language editing companies (<http://www.aje.com>) for revising our manuscript.*

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

With best regards,
