**SPECIFIC COMMENTS TO AUTHORS**

This is a very detailed review of the US diagnosis of abdominal sarcoidosis, eg. Liver , spleen, pancreas and kidney. My suggestion is that the author may add 1 or 2 tables to summarized the US/EUS characters of abdominal sarcoidosis in different organs.

**SPECIFIC COMMENTS TO AUTHORS**

The work addressing the use of ultrasound and the diagnosis of abdominal sarcoidosis is well designed, but it lacks a correlation (specificity and sensitivity) with other imaging methods used for the same purpose. As we know, sonographic methods are operator-dependent, although they are also inexpensive compared to other methods.
