<https://www.linkos.cz/files/klinicka-onkologie/192/4670.pdf>

Current Two EGFR Mutations in Lung Adenocarcinoma – Case Report ... a 63-year-old female with metastatic non-small cell lung cancer with complex EGFR mutation ... Then, we discuss our case with other literature case reports. Together, it seems that described complex EGFR mutation has a relatively good sensitivity for EGFR-TKIs treatment.

## Endometrial metastasis of lung adenocarcinoma: a case report

[https://www.researchgate.net/publication/51521066\\_Endometrial...](https://www.researchgate.net/publication/51521066_Endometrial...)

Endometrial metastasis of lung adenocarcinoma: a case report. The female genital tract is an infrequent site of metastasis, in particular from extragenital primary tumors such as non-small cell lung cancer. Ovarian metastases have been described as disseminations of lung adenocarcinoma; rare cases of secondary localizations in adnexa,...
