1Department of Cardiology, Congenital Heart Diseases and Electrotherapy, ... with atrial fibrillation (AF), but in patients with heart failure (HF) the role of CCB remains unknown. ... assess the safety, feasibility, and success-rates of cryoballoon.

**Name of Journal:** *World Journal of Cardiology*

**Manuscript NO:** 46125

**Manuscript Type:** ORIGINAL ARTICLE

*Observational Study*

**Feasibility and safety of cryoballoon ablation for atrial fibrillation in patients with congenital heart disease**

Sylvia Abadir, Victor Waldmann, Katia Dyrda, Mikael Laredo, Blandine Mondésert, Marc Dubuc, Paul Khairy

**Abstract**

**Background** – The prevalence of atrial fibrillation (AF) is on the rise in the aging population with congenital heart disease (CHD). A few case series have described

### Safety and outcomes of catheter ablation for atrial ...

[https://www.heartrhythmjournal.com/article/S1547-5271\(18\)31356-0/fulltext](https://www.heartrhythmjournal.com/article/S1547-5271(18)31356-0/fulltext)

An increasing number of adults **with congenital heart disease** (CHD) are undergoing catheter **ablation for atrial fibrillation** (AF). Data on **ablation** strategy and outcomes in CHD are limited. Rhythm control is often believed to be of greater importance among **patients** with complex CHD.

### Cryoballoon Ablation for Atrial Fibrillation

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3337368>

Apr 30, 2012 · **Safety of Cryoballoon Ablation**. Major complications have been reported in approximately 5-6% of **patients** undergoing RF **ablation** for AF [7,9,10]. The rate of acute procedural complications reported with **cryoballoon-based ablation** (CBA) is relatively low (<3-5%) and compares favourably with irrigated RF and duty-cycled multi-electrode RF **ablation** [7,9,10,21].

### Intracardiac Echo-Guided Radiofrequency Catheter Ablation ...

<https://onlinelibrary.wiley.com/doi/full/10.1111/j.1540-8167.2008.01249.x>

Introduction: **Patients** with atrial septal defect (ASD) are at higher risk for **atrial fibrillation** (AF) even after repair. Transseptal access in these patients is perceived to be difficult. We describe the
