INFORMED CONSENT STATEMENT

Title: Feasibility and Safety of Cryoballoon Ablation for Atrial Fibrillation in Patients with Congenital Heart Disease

MS Number: 46125

Authors: Sylvia Abadir, MD; Victor Waldmann MD, MPH; Katia Dyrda, MD, MSc; Mikael Laredo, MD; Blandine Mondésert, MD; Marc Dubuc, MD; Paul Khairy, MD, PhD

Statement: The study was approved by our institutional research and ethics committees with waiver of informed consent. Analyses were performed on de-identified data and all patients consented to receiving the catheter ablation procedure deemed medically indicated.

Sincerely,

Paul Khairy, MD, PhD, FRCPC
Professor of Medicine and Research Chair, Université de Montréal
Scientific Director, Montreal Heart Institute Adult Congenital Centre
Director, Clinical Epidemiology and Outcomes Research,
Montreal Health Innovations Coordinating Center (MHICC)
