Proton pump inhibitors and adverse effects in kidney transplant recipients: A meta-analysis

Boonpheng B *et al.* PPIs and kidney transplantation

Boonphiphop Boonpheng, Charat Thongprayoon, Tarun Bathini, Konika Sharma, Michael A Mao, Wisit Cheungpasitporn

Abstract

BACKGROUND

The adverse renal effects of proton pump inhibitors (PPIs) are increasingly recognized in both the general population and patients with chronic kidney disease. Several pharmacokinetic studies have also raised concerns regarding the interaction between

Proton-Pump Inhibitor - an overview | ScienceDirect Topics

<https://www.sciencedirect.com/.../proton-pump-inhibitor>

Proton pump inhibitors are capable of causing complete cessation of **gastric acid secretion**. There is no direct evidence in **dogs** and cats that achlorhydria is harmful, but long-term data are lacking. Currently, there is no evidence that bacterial **overgrowth** occurs in either **dogs** or cats with long-term **therapy**.
