## **Subtraction hemiarthroplasty in basal joint arthritis: A case report**

Bäcker HC *et al.* Subtraction hemiarthroplasty

Henrik Constantin Bäcker, Christina E Freibott, Melvin Paul Rosenwasser

### **Abstract**

#### **BACKGROUND**

Basal joint arthritis is a common disease which is especially present in post-menopausal women. A variety of procedures have been described once conservative treatment has failed. The purpose of our study is to present a novel surgical technique based on a clinical case with three-year follow-up which is highly effective, even after failure of previous procedures.
