**Simulation in endoscopy: Practical educational strategies to improve learning**

Rishad Khan, Michael A Scaffidi, Samir C Grover, Nikko Gimpaya, Catharine M Walsh

### Abstract

In gastrointestinal endoscopy, simulation-based training can help endoscopists acquire new skills and accelerate the learning curve. Simulation creates an ideal environment for trainees, where they can practice specific skills, perform cases at their own pace, and make mistakes with no risk to patients. Educators also benefit from the use of simulators, as they can structure training according to learner needs and focus solely on
