

## Biostatistics Statement

Dear editors,

The study titled *The Feasibility of Prostatectomy without Prostate Biopsy in the era of New Imaging Technology and Minimally Invasive Techniques* reported 11 cases of prostatectomy without prostate biopsy. No statistical methods for comparison was used in this study, and the data were described by mean, median and standard deviation. So we didn't invite a professor majoring in medical statistics to check our manuscript.

Thank you very much.

Sincerely,

A handwritten signature in black ink, appearing to read 'Xing Nianzeng', with a stylized, flowing script.

Xing Nianzeng M.D., Ph.D.
